PRESTWICK WOOD PRESERVATION SYSTEM

FINISHED IRON WOODS™

WEATHERED IRON WOODS™

FINISHED TEAK

WEATHERED TEAK

FINISHED WOODLANDS

WEATHERED WOODLANDS

Our three-part wood preservation system is the longest lasting process of its kind offered for golf course furnishings. It is the same system used during manufacturing to protect the appearance of our Iron Woods™ and Woodlands collections. While we make every attempt to maximize product endurance, all wood furniture exposed to the elements will eventually require some maintenance.

The performance of our wood preservation system is greater than the sum of its components. Each of the three parts is formulated to achieve separate, but complementary, functions.

CLEANER Our wood cleaner removes surface dirt, grime, pollen, mold, and mildew without harming the wood or the finish. As compared to bleach solutions, this cleaner does not upset the natural pH balance of the wood, preventing fiber damage and iron tannate stains.

STAIN With its two-coat application, our stain helps ensure consistent color on your furnishings for many years.

CLEAR COAT This protective clear coat enhances wood depth and highlights for a truly distinguished appearance. It also maximizes life of the stain. Containing acrylic resin and additives, our clear coat provides ultimate UV protection, water repellency, and mildew resistance.

RESTORATION KIT
HWRK07 - \$133

Our three-part wood preservation system is available in a convenient restoration kit. It includes quarts of cleaner, stain, and clear coat as well as a sponge and an application brush.
